DIGITAL MARKETING TRACK

Basic Meta Ads Campaign Plan

FitNest Studio — Free 3-Day Trial (Hypothetical)

Prepared by: **Reddi Malli Nandini**
Date: 21 October 2026
Tools: Meta Ads Manager · Canva · Google Sheets

Item	Plan
Business	FitNest Studio (fictional) — gym & group fitness, Kondapur, Hyderabad
Business outcome	More trial visits → more memberships
Offer	Free 3-day trial pass
Meta objective	Leads (Instant Form)
Audience	3 cold ad sets + 1 retargeting ad set
Placements	Facebook & Instagram Feed, Stories, Reels
Budget	₹15,000 over 28 days (₹4,200 test · ₹10,500 scale · ₹300 buffer)
Primary KPI	Cost per Lead ≤ ₹150
Forecast	~103 leads · ~₹143 CPL · ~13 new members · ~2.2x first-month ROAS

Objective of the task: understand the fundamentals of paid social advertising. All business details and numbers are hypothetical.

1. Campaign Objective

The hint for this task was to **match the campaign objective with the desired business outcome**. FitNest wants people to walk in for a trial so trainers can convert them into members. To book a visit, the front desk needs a name and phone number. That is why the campaign uses the **Leads** objective with a Meta Instant Form — Meta then shows the ads to people most likely to submit a form, not just people who click.

Objective	Decision	Reason
Leads	✔ Chosen	Optimises for form submissions = trial bookings
Awareness	✘	Cheap reach but no measurable sign-ups
Traffic	✘	Optimises for clicks; no strong landing page
Sales	✘	Needs website purchases + Pixel; memberships sold in person

2. Campaign Structure

Level	Name	Budget / Dates	Ads
Campaign	FitNest_Leads_FreeTrial_Nov26	Objective: Leads · ABO in test	—
Ad set 1	AS1_Broad_Local_5km	₹200/day · Day 1–7	A, B, C
Ad set 2	AS2_Interests_Fitness_8km	₹200/day · Day 1–7	A, B, C
Ad set 3	AS3_Working_Professionals	₹200/day · Day 1–7	A, B, C
Scale	Winner of AS1–AS3	₹350/day · Day 8–28	Best performers
Ad set 4	AS4_Retargeting_Warm	₹150/day · Day 8–28	B, A-reminder

Placements

- **Used:** Facebook & Instagram Feed (1:1 creatives), Stories & Reels (9:16 creative).
- **Excluded:** Audience Network, Messenger inbox, right column — lower lead quality for a local offer.
- Manual placements during the test for clean comparison; Advantage+ placements in Phase 2.

Lead form

- Type: Higher intent (adds a review step → fewer junk leads).
- Fields: Name, Phone (pre-filled), Preferred slot (Morning/Evening), Fitness goal.
- Thank-you screen: “Our team will call you within 24 hours to book your first session.”

Optimisation timeline

When	Action
Day 1–3	No changes — learning phase
Day 4	Pause ads with CTR < 0.5% after ~3,000 impressions
Day 7	Compare ad sets by CPL; keep the best, pause the rest
Day 8	Launch retargeting; winner to ₹350/day
Day 14, 21	Check frequency; refresh creative if > 3
Day 28	Final report & cost per member

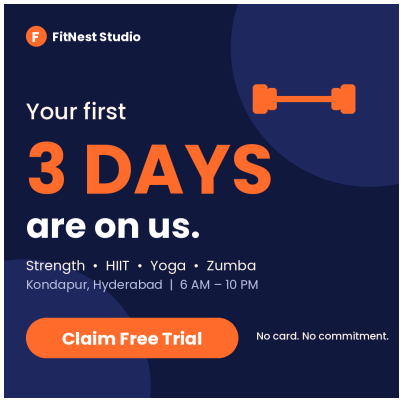

3. Audience Definition

Persona — "Busy Priya / Busy Bhargav": 24–38, works in IT or a corporate job around HITEC City, Gachibowli or Madhapur, lives within 5–8 km of Kondapur. Sits 9+ hours a day, wants to get fit but has "no time" and finds big gyms intimidating. Scrolls Instagram Reels in the evening.

	AS1 Broad Local	AS2 Fitness Interests	AS3 Working Prof.	AS4 Retargeting
Location	5 km around Kondapur	8 km around Kondapur	HITEC City, Gachibowli, Madhapur, Kondapur (3 km pins)	—
Age	22–40	22–40	24–38	18–45
Targeting	Broad (algorithm-led)	Physical fitness, Gym, Yoga, HIIT, Zumba, Healthy diet, Running	IT / software / startups narrowed by fitness interest	Page & IG engagers (30d), form openers, 50% video viewers
Exclusions	Existing members, past leads	Same	Same	Past leads
Est. size	~6–9 lakh	~3–5 lakh	~1.5–3 lakh	~5–20k

The three cold ad sets run the **same ads with the same budget**, so any difference in CPL comes from the audience — a simple A/B test of who responds best.

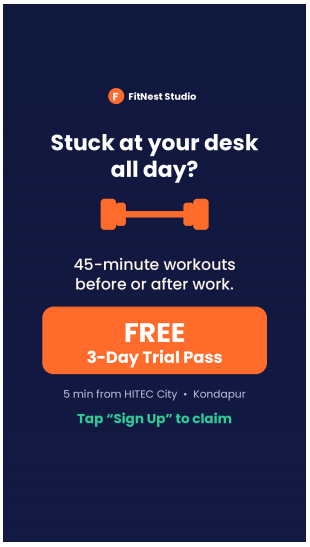

4. Ad Creative

Ad A – Offer
1080×1080 · Feed

Ad B – Social proof
1080×1080 · Feed

Ad C – Problem/solution
1080×1920 · Stories/Reels

- Brand colours (navy + orange) for recognition; one big message per creative.
- Short on-image text; details go in the primary text.
- Story creative keeps text out of the top/bottom areas covered by Instagram's interface.

5. Ad Copy

Ad	Primary text	Headline	CTA
A – Offer	New to the gym or getting back after a break? Your first 3 days at FitNest Studio are completely FREE — strength, HIIT, yoga & Zumba, guided by certified trainers. Kondapur | 6 AM–10 PM | No card, no commitment.	Claim Your Free 3-Day Pass	Sign Up
B – Social proof	“I finally found a gym I actually look forward to.” – Priya (sample testimonial). 1,200+ members train with us in small batches, so a coach actually knows your name. Your first 3 days are on us.	Rated 4.8/5 by Our Members	Book Now
C – Story/Reel	Stuck at your desk 9 hours a day? 45-minute workouts that fit before or after work. 5 minutes from HITEC City. Grab your FREE 3-day trial pass	45-Min Workouts Near HITEC City	Sign Up
A – Retargeting	Still thinking about it? Your free 3-day pass is waiting — but this month’s slots are filling up. Takes 30 seconds to claim.	Your Free Pass Is Still Here	Sign Up

Emoji used in the live ads are listed in docs/03-ad-copy.md.

Copy principles

- Hook in the first line (visible before “…See more”).
- One offer and one CTA per ad.
- Local cues (Kondapur, HITEC City) make the ad feel relevant.
- No before/after or body-shaming claims — these conflict with Meta’s advertising standards.

6. Budget Plan

The hint was to **start with a small test budget**. Only 28% of the budget is spent in Week 1 to learn which audience gives the lowest cost per lead; the rest goes to the winner and to retargeting.

Phase	Ad set	Days	Daily	Total
1 – Test	AS1 Broad Local	1–7	₹200	₹1,400
1 – Test	AS2 Fitness Interests	1–7	₹200	₹1,400
1 – Test	AS3 Working Professionals	1–7	₹200	₹1,400
2 – Scale	Winning prospecting ad set	8–28	₹350	₹7,350
2 – Scale	AS4 Retargeting	8–28	₹150	₹3,150
Buffer	Contingency	—	—	₹300
	Total			**₹15,000**

Budget type: daily, ad-set level (ABO) during the test. Bid strategy: Highest volume. Full Google Sheets file with formulas: budget/budget-plan.xlsx (Budget Plan, Forecast, KPI Tracker).

7. KPI List

KPI	Formula	Target	Role
Cost per Lead (CPL)	Spend ÷ Leads	≤ ₹150	PRIMARY — decides winners
CTR (link)	Clicks ÷ Impressions	≥ 1%	Creative attention
CPC (link)	Spend ÷ Clicks	≤ ₹12	Click cost
CPM	Spend ÷ Impr. × 1000	≤ ₹150	Audience cost
Form conversion rate	Leads ÷ Clicks	≥ 6%	Form friction
Frequency	Impressions ÷ Reach	≤ 3 / week	Ad fatigue
Hook rate (Reels)	3-s views ÷ Impressions	≥ 25%	Scroll-stopping power
Lead → trial show-up	Visits ÷ Leads	≥ 50%	Lead quality (offline)
Trial → member	Members ÷ Visits	≥ 25%	Sales (offline)
Cost per member	Spend ÷ Members	≤ ₹1,200	Business efficiency
ROAS (1st month)	Revenue ÷ Spend	≥ 2x	Return

Forecast (planning assumptions)

Spend	Impressions	Clicks	Leads	CPL	Visits	Members	ROAS
₹14,700	~1,22,500	~1,470	~103	~₹143	~51	~13	~2.2x

Assumptions: CPM ₹120, CTR 1.2%, form conversion 7%, show-up 50%, trial-to-member 25%, membership ₹2,500/month.

Decision rules

- CTR < 0.5% after 3,000 impressions → pause the ad.
- CPL > ₹250 after ₹1,000 spent → pause the ad set.
- Frequency > 3 → refresh creative.
- CPL < ₹120 for 3 days → raise budget by 20% (small steps avoid resetting learning).

8. Key Learnings

- The objective must match the business outcome — Leads, not Traffic, for a trial offer.
- A small, fair test (same ads, same budget, different audiences) shows where to spend.
- One primary KPI decides; secondary KPIs explain why.
- Creative acts as targeting — different hooks attract different people.

Disclaimer: FitNest Studio, its testimonial, rating and member count are fictional, created only for this learning task.
